our mission.

We make it **painless** for brands to deliver **frictionless** conversational AI experiences.

our moonshot.

Create a super-smart world where life is less hard for everyone.

why we do what we do.

The Big Idea

We are inspired by the promise of the Fourth Industrial Revolution — a smarter, more connected world where more and more people will have access to the super-smart technology they need to truly excel in their lives and be the hero of their own story.

life is hard enough. customer service should be easy.

Einstein once said, "computers are incredibly fast, accurate, and stupid. While human beings are incredibly slow, inaccurate, and brilliant. Together they are powerful beyond imagination." This inspires us to do what we do.

SmartAction was born out of a revolutionary AI think tank with a bold dream to leverage the power of human-machine collaboration, a human-centric work culture, and human-centric design to create a super-smart human-machine interface for a super-smart world.

brand voice.

Brand Voice

We're obsessed with the intersection where CX meets Alpowered automation because this is where the most human-centric AI transformation happens.

We believe, as Einstein once said, that "computers are incredibly fast, accurate and stupid; human beings are incredibly slow, inaccurate, and brilliant; and together they are powerful beyond imagination."

That's why we've taken a team of CX experts and paired them with a team of AI experts to harness the power of AI automation within a Human-Centric Design. Here, the CX is put above all else, creating a supersmart world that works for everyone.

Brand Tone of Voice

The brand voice should make it clear that we are thought leaders and pioneers in the AI space while equally expressing that we're regular, down-to-earth Joes. We really just want to make life less hard — for contact centers, customers, and our own team members — and we use super-smart tech to do it.

Sometimes we use big , intellectual words but we make sure to pair them with easy-to-understand, relatable verbiage so anyone, anywhere can understand what we're talking about.

Grid

The icon grid establishes clear rules for the consistent, but flexible, positioning of graphic elements. For icons created in Adobe Illustrator, the grid feature helps ensure correct sizing and spacing when designing.

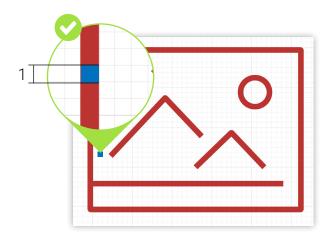

Spacing

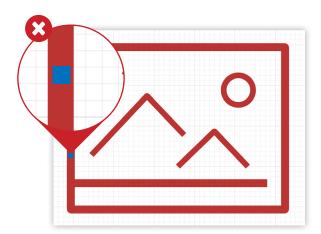

Include at least 3dp of padding around live area.

Sizing

System icons use a consistent stroke width of 1dp, including curves, angles, and both interior and exterior strokes.

Do

Use consistent stroke weights of 1dp.

Don't

Use inconsistent stroke weights or weights exceeding 1dp.
